The LoopDVP HD is a High Definition Digital Video Player which uses flash memory cards. The total absence of mechanical parts in its design guarantees absolute reliability.

One of the most common applications for HD flash video players is playing one video in a loop. This application requires no control mechanism, and no configuration. Plug and play in it's simplest form - you plug, it plays. The player can play H264 and MPEG2/4 files up to FullHD 1080P.

A cost-effective solution for simple installations which will save both time and effort for technicians by reducing the unused control modules found in alternative players.
