Warranty

8 Years Warranty (see website for T&C's)

The OneDVP-HD is a Digital HD Video Player which has been designed for the increasingly common situation where a default video runs in a loop, and another video has to be triggered at a certain point.

The OneDVP-HD uses flash memory cards. The total absence of mechanical parts in its design guarantees absolute reliability.

Configurable by a simple text file, the OneDVP-HD is flexible enough to provide solutions to a wide range of applications. A professional hardware video scaler ensures real-time, high quality, full HD output.
